<i>James H. Morgan</i>	11/9/84	<i>William J. Smith</i>	3-27-85
15 Comments (Please Initial)			

The subject matter is expected to be of interest only to RHO and PNL and should be disseminated only to DOE and DOE contractors in accordance with DOE Form RA-426. Most of the Hanford Works (HW) documents referenced in this report are not publically available; three of them are still classified. However, the HW documents contain information of a historical nature that is essential to the present report. The lack of public availability of a portion of the HW documents does not detract from the value of the present report.

# THOB/MANAGEMENT SIGNOFF CHECKLIST

In completing this checklist, you are saying that you have reviewed the attached draft in terms of the matters on the checklist and that you have resolved any questions or concerns by consulting with the appropriate Battelle or Sponsor people. Note such resolutions in the Comments section provided.

1. Does this draft disclose any new process, machine, manufacture, or composition of matter, or any improvement thereof? If "Yes",
  - Where in this draft is it disclosed?
  - Has it been previously reported? Where?
  - Has an invention report been submitted to BNW Patent Office?
2. Is there any comparison of products or manufacturers; e.g., unfavorable evaluation or actual implied endorsement of a named product? (Call Legal or Patent for help.)
3. Does this draft contain proprietary or confidential information? (Call Legal or Patent.)
4. Does this draft contain sensitive information or relate to policy issues/concerns of Battelle and the sponsor; e.g., subjects of media interest, waste management, Hanford site? (Check with management, Public Relations, or your sponsor.)
5. If the draft is an account of work for a "non-1830" sponsor and intended for public release, do you have written permission from your sponsor(s) for such release?
6. Does the draft contain any technical data restricted for export to foreign countries or foreign nationals under DOE or other federal export regulations, e.g., applied technology? (Call Patent for help.)
7. Does this draft reproduce any copyrighted material? (Submit all copyright transfer forms and publishing agreements to BNW Patent. Call Patent for help.)
8. Will cited references be publicly available at the time this draft is published? (References to 'personal communications' and 'in press' citations should not appear in a published reference list. Call Publishing Coordination for help.)
9. Have you reviewed your distribution list in the last year to assure that all recipients need copies and addresses are correct? (Call Publishing Coordination for help.)
10. On 1830 reports, if "other-than-officially-required-by-DOE" distribution exceeds 100, you must have a current approval letter from your sponsor on file in the Clearance Office. Have you such approval if you need it? (Call Publishing Coordination for help.)
11. Does this draft contain contributions from authors of other organizations? If so, clearance from such other organizations may be necessary. (Call Publishing Coordination for help.)
12. Are there persons outside your section or department who should review this product before final release (e.g., program or project manager)?
